

# RMB CVRC Seminar

The Robert M. Berne Cardiovascular Research Center Presents

## Jeff Saucerman, PhD

**Affiliation:** Professor of Biomedical Engineering and Cardiovascular Medicine,  
University of Virginia, Charlottesville Virginia

### **Systems biology to predict drivers of cardiac differentiation and fibrosis**

The heart's form changes substantially through development and disease, yet how this is controlled by molecular networks is unclear. In this talk, I will present our computational and experimental systems biology research on cardiac differentiation and fibrosis. These studies identify pathways and drugs that have potential towards cardiac disease.
