

# RMB CVRC Seminar

The Robert M. Berne Cardiovascular Research Center Presents

## Gael Genet, PhD

**Affiliation:** Research Assistant Professor of Cell Biology, University of Virginia, Charlottesville Va.

### **Endothelial Cell Cycle Control in Vascular Malformations: Therapeutics Implications in Hereditary Hemorrhagic Telangiectasia**

The hypothesis of our work is that improper cell cycle control in endothelial cells is a key factor leading to vascular malformations and that drugs regulating cell cycle could represent a new therapeutic strategy for Hereditary Hemorrhagic Telangiectasia patients
