

RMB CVRC Seminar

The Robert M. Berne Cardiovascular Research Center Presents

Sergio Fazio, MD, PhD

Affiliation: VP/Chair, Scientific Council, Global Clinical Development, Regeneron

Lessons from the adverse events reporting in ODYSSEY Outcomes, a large, placebo-controlled, randomized clinical trial of an LDL-lowering agent

- Discuss rigor and value of adverse event reporting from randomized clinical trials for exploratory analyses and hypothesis-generating results.
- Discuss adverse events as predictors of adjudicated outcomes with regulatory value.
