

RMB CVRC Seminar

The Robert M. Berne Cardiovascular Research Center Presents

Giuseppe Biondi-Zoccai, MD, MSTAT

Affiliation: Associate Professor, Sapienza University of Rome, Latina, Italy

From Data to Discovery: The Role of AI in Transforming Healthcare Research

This talk will focus on the current and future role of AI tools in medical research, highlighting the subtleties of leveraging this powerful tool to increase efficiency and productivity of research efforts, without sacrificing accuracy, validity and competency. We will cover the use of novel AI tools for background research, hypothesis generation, study design and supervision, data analysis, reporting, interpretation and implementation. We will focus in particular on ChatGPT and Gemini, but we will briefly highlight the role of other novel AI tools as well.

**** Those attending will be provided a free PDF copy of the book ****

Monday, October 28th, 2024

11:00 AM-12:00 PM

MR5 Room 1005
